

# Maine Bi-weekly Gonorrhea Surveillance Report

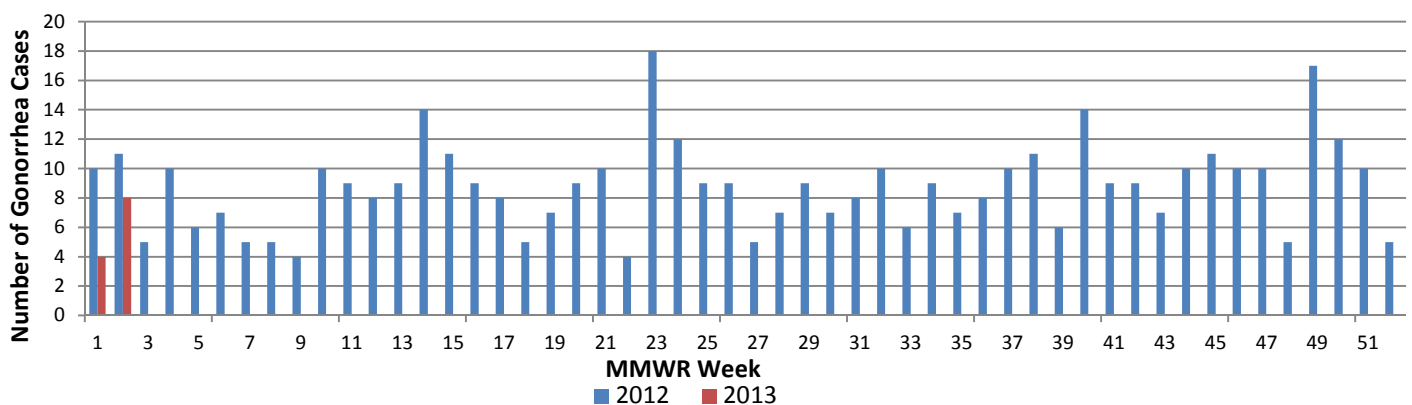

1/16/2013

This update summarizes cases of gonorrhea reported during 2013 received by the Maine Center for Disease Control and Prevention (Maine CDC) from January 1 – January 12, 2013.

A total of 12\* confirmed gonorrhea cases have been reported statewide through January 12, 2013 (MMWR week 2), compared to 21 reported cases in 2012 and 2 reported cases in 2011 during the same period. Some cases are reported more than once and may represent reinfection, recurrent infection, or persistent infection.

\*Additional cases may have occurred, especially in the most recent weeks, which are not included in this report.
